Principle Areas of Consultancy

■ Hazardous Materials Affairs / News / Advice ■ SDS Preparation & Review ■ Chemical Control Management

Qualifications /

Professional / Industry Association Memberships

Diploma Applied Science (Chemistry), SUT, 1973.
Graduate Diploma in Chemical Engineering, (SUT), 1993.
Extra Risk Engineering subjects were completed in excess of the basic requirements.

Member, Royal Australian Chemical Institute.
Member, Australian Institute of Occupational Hygienists.
Member (until June 2017), Fire Protection Association of Australia.
Member, Australasian Institute of Dangerous Goods Consultants
Convene the Dangerous Goods Advisory Group, Victoria
Co-convene the Chemical Hazard Communication Network, Melbourne
Member, Aerospace Occupational Health & Safety Association (AEROSHA)
Member, UK Chemical Hazard Communication Society
Member (until June 2017), Plastics and Chemical Industries Association

Industries Consulted To:

Chemical Trading / Importing, Chemical Storage & Warehousing, Manufacturing Industry, Electroplating, Metal Fabrication, Composites Fabrication, Chemical & Process Industries, Painting and Finishing, Aircraft Industry, Laboratories, Transport of Dangerous Goods, Swimming Pool Centre Chemical Handling, University Campus Chemical and Laboratory Safety Management, Regulatory Authorities.

Type of Advice / Information Provided:

Introduction of Chemical Products:

- o Obtaining, preparing and reviewing Safety Data Sheets for Australia and New Zealand.
- o Meeting Chemical Control Schemes. Evaluation of chemical products. Advice on the facilities required.
- o Preparation of chemical safety and management procedures.

Use of Chemical Products:

- o Hazardous Chemicals (Code and Regulations).

Classifying Chemicals / Substances, Preparing Registers.

- o Implementation of hazardous materials management systems.
- o Dangerous Goods (Storage & Handling) Regulations: Manifests, Placarding, Labelling.
- o Community issues about the use of chemicals and removal of unacceptable chemicals.

Sustainable Industry, Waste Minimisation & Disposal of Chemical Products:

- o What does the community want in place to choose, handle and dispose of chemicals properly?

I have 37 years professional experience. To keep my skills current I have strong networks with other hazardous materials specialists and regularly prepare the "Hazmat & Environment Notes" newsletter to help keep others up to date.

I co-ordinated the industry, professional associations, union and community technical committee to organise the program topics and speakers for the FPAA HazMat Conferences run yearly in Melbourne and Sydney from 2000-2012. Remained a member of the FPAA HazMat Committee that prepared the Technical Programs for HazMats 2013, 14 & 15.
